## Thermal Efficient IG's

Investments are worth protecting especially those that include your home. Glaz-Tech offers a broad range of low-e coatings to go in conjunction with thermal efficient insulated units (IGs). Our line of low-e coatings have been designed to keep you cool during the summer and warm during winter allowing for year-round comfort and help lower energy bills. Although each low-e coating has various features and performances, one of our professionals will help you identify which low-e coating and IG makeup will best fit your requirements.

### Residential & Commercial IGUs

Visit us online at [glaztech.com](http://glaztech.com) for a complete listing of residential & commercial low-e coatings.

Low-E Product	Visible Light% Transmission	U-Value		Solar Heat Gain Coefficient
		Winter	Summer	
RLE 55/27 ( Guardian )	55	0.29	0.27	0.28
RLE 70/36 ( Guardian )	70	0.29	0.28	0.37
Comfort E2 ( AGC )	76	0.35	0.35	0.66
Sungate 500 ( PPG )	76	0.35	0.35	0.66

**Residential IGU Makeup** : 3mm / 12mm A.S. / 3mm
