

CONSISTENT ELEGANCE

Looking for a distinctive ambience in your home or office with a consistent and elegant appearance? Glaz-Tech's versatile Satin Etch glass along with a silky smooth finish is just the answer. Its flexible characteristics allows for great design aesthetics for interior and exterior applications. Its consistent beautiful appearance, easy maintenance, and resistant to stains and fingerprints has become the popular choice for architects, designers, and home-owners alike. Its opaque and polished finish makes it flexible for areas where privacy or design elements are desired.

INTERIOR APPLICATIONS

A COMBINATION OF ELEGANCE AND FABRICATION

DESIGNED FOR EASY MAINTENANCE

Versatility is a key component and its maintenance capabilities makes Satin Etch highly ideal for residential and non-residential applications. Its opaque lustrous finish resists stains, fingerprints, and day to day contact remarkably making it easy to clean.

FABRICATION OPTIONS

Glaz-Tech's versatile satin etch glass allows glass to be cut, drilled, notched, edge polished and tempered without affecting the finish.

Inquiring about a complex design or pattern? GTI's cutting system is powered by state-of-the-art technology. WaterJet technology is compatible with CAD drawings and its versatile cutting system can cut through complex shapes. Its 72" x 120" bed size increases its maximum cutting potential for all your holes, notches, CAD drawings and more.

POWERED BY **WATERJET** TECHNOLOGY

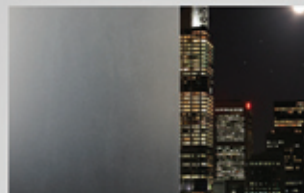

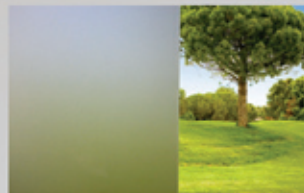

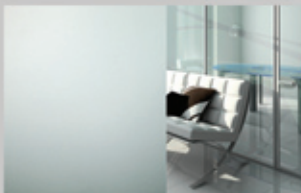

PERFORMANCE DATA

	Incidence of light on etched side	Incidence of light on non-etched side
Light transmittance τ_v (%)	87.5	82.8
Light reflectance ρ_v (%)	7.5	7.2
Ultraviolet transmittance τ_{uv} (%)	48.2	45.4
Solar direct transmittance τ_e (%)	74.2	70.7
Solar direct reflectance ρ_e (%)	6.7	6.4
Total solar energy transmittance g	0.79	0.77

Specifications for 3/8" glass
