

DESIGNED FOR FLEXIBILITY

Glaz-Tech Industries proudly offers tinted glass products for commercial and architectural applications. All tinted & reflective glass provides lower solar light transmission and helps reduce glare by a great margin. By absorbing the sun's heat, it reduces energy consumption, creating a more comfortable interior without obscuring the view outside. Tinted and reflective glass types are designed to compliment building facades and increase thermal efficiency by reducing light transmittance.

DESIGN THROUGH GLASS

APPLICATIONS

- INSULATED GLASS
- ENTRANCES & STOREFRONTS
- SPANDREL GLASS
- ATRIUMS
- SKYLIGHTS
- PATIO DOORS
- STORM DOORS
- STORM WINDOWS
- WINDOWS
- IN CONJUNCTION WITH LOW-E

AESTHETICS . PERFORMANCE . COMFORT

Glaz-Tech's tinted glass products are heat absorbing that not only enhance the exterior appearance of a building but in addition raise the interior energy efficiency while reducing solar glare. Substantially re-radiating the solar energy that it absorbs to the exterior and can reduce energy costs. These hard-working products maximize energy efficiency, especially in regions where air conditioning costs outweigh heating costs.
