

**THE BEAUTY OF GLASS & ARCHITECTURAL APPLICATIONS**

Several architectural, commercial, and now increasingly, residential applications have integrated decorative back-painted glass. Why wouldn't they? The abundance of options gives far more value and representation of an architectural project, commercial site or residential home. With that in mind, Glaz-Tech Industries is proud to offer Dreamwalls Color Glass from Gardner Glass Products. If your project requires a practical and brilliant solution, then Dreamwalls Color Glass is the recommended one. Give yourself the flexibility to be creative in any space that requires eye-catching, durable and easy-to-clean glass applications.

**ORIGINAL. STYLE. BEAUTY.**

An Innovative Way to Blend Glass & Color Beautifully.

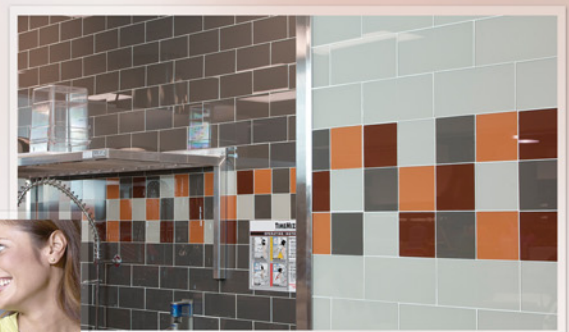

**COLORFUL ADVANTAGE OF DREAMWALLS**

Vibrant and elegant Dreamwalls Color Glass is created from a proprietary paint process that adheres its beautiful finish onto ultra-clear, low-iron Starphire® glass. This process not only feeds to the aesthetic value, but holds other important benefits such as:

- Easy care and cleaning
- Moisture resistance
- Limitless color-matching
- Hygienically non-porous
- Durability
- Vibrant colors

**WHAT IS DREAMWALLS COLOR GLASS?**

Dreamwalls Color Glass by Gardner Glass Products is manufactured using a proprietary paint technology developed specifically for superior adhesion to glass. The color coating is applied to the second surface, or non-contact surface, of the glass. The result is brilliant color combined with the practicality of glass. Gardner uses only Starphire Ultra-Clear Glass®, so the color transmission is the purest available. The paint is applied in one coat, and an additional paint layer is then applied to further protect the color during transport, handling and installation. Finally, durability is ensured by the oven heat-curing process, which creates a paint that adheres incredibly well without brittleness. **- GG Dreamwalls**

**IDEAL FOR COMMERCIAL OR RESIDENTIAL SPACES AS:**

- Showers & bath walls
- Dry-erase boards
- Wall installations
- Cabinet doors
- Elevator walls
- Counter tops
- Backsplashes
- Closet doors
- Headboards
- Table Tops
- Partitions
- Signs

**STOCK AVAILABILITY**

Extensive testing on the two-coat and heat-cured Dreamwalls Color Glass coating verifies its durability and resistance to color fading by UV light, as well as chemicals, cleaners, moisture and humidity. Further degradation testing reveal its non-yellowing properties and excellent scores on adhesion, salt spray, hardness, scratch-testing and weathering. Detailed test results are available at [www.dreamwallscolorglass.com/specifications](http://www.dreamwallscolorglass.com/specifications).
