Product Fabrication Statement

Glaz-Tech Industries is a U.S.-based wholesale fabricator and distributor of commercial and residential glass products. With nine fabrication and distribution facilities across the United States, we are committed to delivering high-quality products that meet the demands of performance, safety, and regulatory compliance.

Fabrication Overview

Glaz-Tech Industries fabricates a wide range of glass products that include the following:

- Insulated Glass Units
- Low-E Glass
- Tempered Glass
- Laminated Glass
- Shower Doors & Enclosures
- Fire Rated Glass
- Bullet Resistant Glass
- Specialty Pattern Glass
- Mirror
- Tinted Glass
- Flat Glass
- Heavy Float Glass
- Spandrel
- WaterJet Fabrication

Glaz-Tech Industries operates fabrication and distribution facilities across the United States, each strategically located to serve regional markets with speed and efficiency. Our facilities process glass from its raw annealed form into fully fabricated, customer-ready products. This includes processes such as cutting, edge seaming, drilling, tempering, laminating, insulating, and/or final assembly tailored to commercial and residential applications.

All final fabrication and assembly takes place at our Glaz-Tech facilities, ensuring that each product is built to specification and subject to strict quality control protocols. This allows us to maintain consistency, meet lead times, and fulfill custom orders across our available product lines.

Material Sourcing

The majority of our raw glass and hardware is sourced from U.S. based manufacturers but may also include instances where glass or hardware is outsourced from international suppliers due to market availability. Materials such as polysulfide sealants, desiccants, spacers, and glass hardware may also originate outside the U.S. depending on supplier sourcing. These materials are integrated into final products only after processing, cutting, and assembly are completed at Glaz-Tech Industries facilities.

Compliance Statement

All final fabrication and assembly of our glass products is performed in the United States. Glaz-Tech Industries products are fabricated domestically using both U.S. sourced and imported materials, in accordance with applicable guidelines from the Federal Trade Commission (FTC) regarding U.S. origin claims.

This statement is intended to support our customers with submittal documentation and underscores Glaz-Tech Industries' commitment to honest representation, regulatory compliance, and manufacturing practices.
